Artist

New Yorker

Translator

As a kid growing up in the streets of Bklyn. I have always been interested in connecting art to the built and external environment. I am currently working in a simple style that translates quickly into a easily read, pictographic language that looks like a classroom black board or the work of a kid on an asphalt street. This creates a convergence between graffiti, coding and the mathematical deduction of every language.

- This build a two dimensional architecture formed from words, signs and symbols.
